Recognizing risk is good. Knowing what to do is better.

Travelers Virtual Risk Manager (VRM) is a Web-based risk assessment tool designed to compare your current safety and risk management practices with best practices. Built by our Risk Control specialists, this tool is ideal for managers (of any level) who want to examine their current risk profile and determine ways to prevent and/or mitigate loss.

Choose from Seven Assessments

With Travelers Virtual Risk Manager, you have a self-service tool that puts you in control. Simply choose from any of seven risk topics, answer a series of Yes/No questions, and based upon your responses, receive feedback that pinpoints areas for potential improvement and possible risk solutions to help you address them.

Get Practical Advice

Travelers VRM assesses how well you are accomplishing some fundamental safety practices and also measures you against best practices. To improve, we’ll offer solutions and identify specially targeted resources to get you on your way.

Use Anywhere, Anytime

You have a busy life. Making Travelers VRM easy to use was a key component of the design process. So, we’ve taken the best of what we know, and put it online so you can leverage our expertise anytime, anywhere, with ease. Start and stop at any time; we store the data and results for you, or enable you to share it with others.

Customize It to Fit Your Needs

Travelers VRM is not a one-size-fits-all application. Three customization features exist: 1) tailor the assessment to best meet your needs; 2) adjust your answers to receive updated, customized action plans; and 3) track progress and assign responsibilities to important initiatives.

Get Started Today!

To get started, go to travelerscanada.ca and locate the Risk Control Services link under Risk Management. Once you’ve registered for the Risk Control Customer Portal, use your User ID and Password to enter the secure site. Then click on Travelers Virtual Risk Manager on the home page.
